Office Management System (OMS)

- Engineered real-time attendance and employee tracking modules using React.js and MobX-State-Tree within a Single-SPA Microfrontend architecture.
- Integrated FastAPI REST endpoints to deliver instant data updates and smooth user interaction across enterprise dashboards.

Axya Project

- Managed complex asynchronous state logic by integrating Django REST Framework APIs using Redux-Saga.
- Embedded Userpilot SDK to enable user behavior tracking, custom event analytics.
- Partnered closely with UI/UX designers and backend teams.

Bitemate (Web App)

- Integrated PubNub SDK to enable real-time messaging, live status updates, and push notifications for active users.
- Structured global application state using Redux to ensure synchronized data across all active client sessions.

PROJECT

Roomify - Interior Design Web App

GitHub Project - React.js, TypeScript, Firebase, Tailwind CSS, Vercel

- Implemented Firebase Authentication with Google and email/password sign-in.
- Built a Design Studio where users can arrange furniture and create customized room designs.
- Deployed the application on Vercel with Firebase integration.
